Caveat Filing Fee	\$ 100.00	ea	

*Plus, additional construction costs over maximum installation investment (\$30,000)

All applicable taxes will be applied to the above rates. Rates Subject to Change.

INFILL CONSTRUCTION INFORMATION

Infill Rates

The Rockyview Gas Co-op Ltd. (RVGC) infill contract rate covers costs and services up to and including the meter set during the construction season. All contract rates are for a maximum connected load of 1 GJ/Hr with the exception of Urban Infills.

Please note, should the cost of the installation exceed \$30,000.00, the contract holder will be responsible for any additional cost over \$30,000.00 (commercial installations are responsible for ALL construction fees).

Any yard lines after the meter to other buildings (referred to as secondaries) are the contract holder's responsibility and will be at the contract holder's expense; however, RVGC would be happy to assist with secondary construction.

Construction Season / Off Season Construction

The RVGC construction season is May 1 to September 30. Due to the nature of completing construction during the off season (October 1 to April 30), any requests to be completed outside the standard season will be subject to a minimum, non-refundable off season construction premium.

Construction Heat

Supplying construction heat requires multiple additional site visits. Riser positioning must be appropriate prior to requests for construction heat being approved. Construction heat connections will be subject to a minimum of the standard Field Service Fee for each site visit following utility installation. A Construction Heat Permit will also be required.

Meter Connection

All new meter connection requests will require a gas permit and Service Completion Notification that has been completed by a Journeyman Gas Fitter. Services that have been disconnected for greater than six months will also require a Gas Permit and Service Completion Notification prior to reconnection.
